Our entire range is fabricated on site by skilled artisans using quality materials and traditional manufacturing methods. Cannock Gates products are built to last: in these pages you'll find a wide range of styles and sizes to complement every setting, all with one thing in common - Quality!

Customers are welcome to call at our factory premises, where we have a showroom displaying our gates. Open from 9am to 4:30pm Monday - Thursday, 9am to 3:30pm Friday.

# THE ART OF MAKING GATES

---

As a result of our long-standing expertise, we can also offer a comprehensive advisory service which will provide you with all the help you need on measuring, fixing and fitting gates - or any design or technical issues. We hand-make every gate, so if you can't find the size you want, or you would like us to manufacture a gate to your own design, call us for details of our bespoke service.

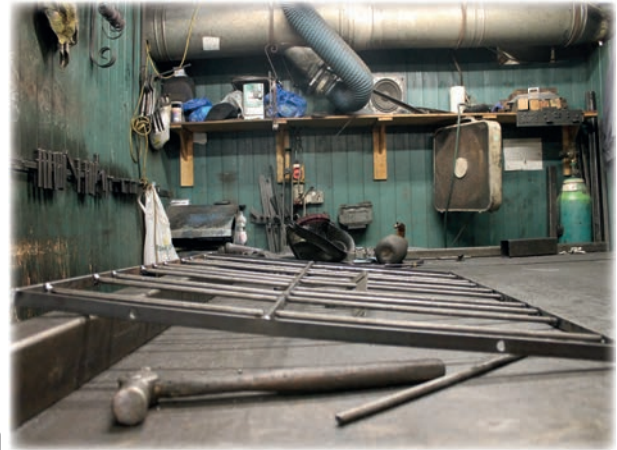

# THE ELEGANCE OF WROUGHT IRON STYLE GATES

A beautifully-crafted Cannock wrought iron style gate will create a spectacular entrance to your property, transforming your home and enhancing it's value. Made to last, our 10-year guarantee is your assurance of quality.

Our wrought iron style gates are supplied with a black primed finish as standard, ready to over-coat with a proprietary brand of exterior enamel paint to provide a lasting, rust-resistant finish. Alternatively we are happy to supply your gate with a painted finish meaning it won't require home painting. We can also zinc plate and black powder coat finish or galvanise your product for extra protection.

For enduring strength, grace and gravitas, choose from our beautifully designed, traditionally crafted selection of wrought iron style gates. Form and function triumphantly united.

# THE NATURAL BEAUTY OF WOODEN GATES

For character and warmth, there's nothing to beat natural wood, each piece unique. Cannock wooden gates are constructed to the highest standards by time-served craftsmen and carry a 5-year workmanship guarantee.

We use only the best smooth-planed Scandinavian redwood from managed forests, making our gates as resilient as they are beautiful. Traditional "mortise and tenon" joints are used - an age-old method, proven to give lasting strength and durability. Our gates are supplied as natural wood with no finish applied, which allows you to choose your preferred finish or exterior wood paint to protect your gates and achieve the colour that you want. Alternatively, all wooden gates can be finished by ourselves in any of the following water-based finishes.

# TOWN FIELD GATE/COUNTY FIELD GATE

A superb, traditional five-bar gate, Town is a great favourite with our customers. The robust frame is strengthened by symmetrically arranged diagonal bars which hold the horizontal rails firmly in place too. A narrow gate can be hung alongside a wide gate, forming a useful separate pedestrian entrance.

CLEAR

WALNUT

Based on a classic five-bar design, County's signature look is defined by its striking, curved hanging stile which forms an elegant profile stretching beyond the gate's 4' closing stile. An extended diagonal bar connects the curved stile to its opposite corner on wider models, reinforcing the County's strength and holding the horizontal rails securely in place. A narrow gate can be hung alongside a wide gate, forming a useful separate pedestrian entrance.

Dalby gates, made from sturdy tongue and groove in a strong framework, offer style, quality and tremendous value for money; simple, rustic elegance to suit any number of different settings. Dalby gates are supplied untreated as standard, for you to apply your preferred finish to achieve the colour you want, or we can supply your gate pre-treated against the damaging effects of the weather – please call for details. Fittings and accessories are available separately.

Royal Talisman

Royal Range

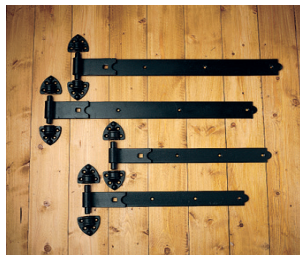

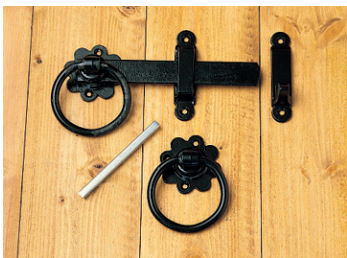

Royal Monarch

Railings offer a straightforward, elegant solution to enclosing part or all of your property. Available in heights of 18" (46cm), 2' (61cm) and 3' (92cm), the railings come complete with adjustable side feet and can be ordered with intermediate, end and corner posts if required. Royal railings (designed to complement all our Royal gate ranges) and Royal Monarch railings are made from heavy-duty steel. Royal railings come with fleur-de-lys finials as standard, or you can choose the safety ball-top fleur or ball finial. Please state your preference when ordering. All railings are supplied with a black primed finish as standard, or we can supply them with a painted finish. Our railings can be made to bespoke heights and widths.

# ACCESSORIES AND ESSENTIALS

At Cannock Gates, we aim to provide everything you need for the successful installation of your gates and railings. We have a great range of latches, locks and hinges to suit all of our products. For wooden gates, we offer Scandinavian redwood, pressure treated softwood and Oak posts. It is worth noting that although Oak is an extremely robust timber that has been used in the construction industry for centuries, it requires good weather protection. Oak can be prone to splits but don't worry this is completely normal as the wood dries over time. Blue-stain mould spores are likely to be present on any piece of timber and will be activated by moisture. Also, Oak has a high tannin content which, if not properly sealed, can wash out leaving patchy colour and staining to the surrounding areas – wall, patio, etc.

We also have a range of professional fit Automation Systems and can supply your gates automation ready. For any advice on our automation sets, please call us.

## Why choose to automate your gates?

There are three major benefits delivered by automated gates: privacy, security and convenience.

**Privacy.** They control access to your property and keep out unwanted callers and prying eyes.

**Security.** A good set of automated gates completes your security perimeter and can be a significant deterrent to burglars especially the opportunist burglar.

**Convenience.** Many properties have gates that are rarely closed because it is just too much trouble to open and close them manually. A set of automated gates with a hand-held remote control makes it easy to actually use your gates and to keep them closed at all times except when access to your home is needed.

We offer a wide range of professional-fit automation systems and optional extras for different applications. Please call and speak to one of our experts who will be able to advise you on which system is best suited to your requirements.

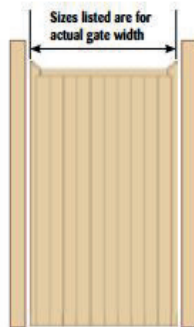

# IMPORTANT INFORMATION

## Wooden gates

The width measurements shown for wooden gates are for the actual size of the gate, NOT the gap size. You will need to allow for posts (if not already in place), fittings and clearance at the centre (when ordering drive or estate gates)

Please note:

- There are many different ways of installing wooden gates so we recommend you contact our Technical Sales Team for advice.
- Heights quoted are for the actual height of the gate. When hanging, allow 2" (5cm) for ground clearance.
- All wooden gates are made from PEFC certified, smooth-planed Scandinavian redwood. Laminated profiles are used for some models.
- All wooden gates are supplied untreated as standard. Gates must be treated with a high quality oil based wood preservative, or exterior wood paint, before any fittings are attached.
- All wooden garden and side gates are right hanging as viewed from the roadside, except 3' (92cm) high Derbyshire garden gates and Town and County field gates, which can be ordered as right or left hanging.
- Fittings and accessories are sold separately.
- Weights shown in the price list are the approximate weight of the heaviest gate.
- All sizes are nominal.
- Gates should be checked immediately on receipt, to ensure that they are to your specification/satisfaction. Once checked, they should be treated before attaching any fittings or exposing to the elements.

## Bespoke Services

If you can't find a gate to suit your requirements from our standard range, call and talk to us about producing a bespoke gate. Whether you would like one of our designs in a non-standard size, or a gate made to your own design, we can usually help. As a general guide, we can make wooden gates up to a maximum of 6'6in high and pairs to a total width of 12' (3.66m). We can make steel gates to a good range of heights and pairs to fit a gap width of 20' (6.10m). Whatever your requirements, just give us a call.

## Wrought iron style gates & railings

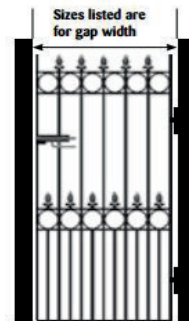

The width measurements shown for wrought iron style gates/railings are for the gap size between your posts, pillars or walls, NOT the actual size of the gate/railing. Simply measure from the inside of one gate post to the inside of the other gate post. The gate/railing and free adjustable fittings we supply will fit that gap size. If you require steel gate posts, tell us and we will make the necessary allowances for these too.

Intermediate, end and corner posts are available for railings

– call our Technical Sales Team for advice.

Please note:

- Heights quoted include 2" (5cm) for ground clearance, therefore a gate listed as 6' (1.83m) high will measure 5'10" (1.78m) high when delivered and 6' (1.83m) high when hung.
- For aesthetic reasons our arched side gates are made to a true radius, therefore heights will vary slightly, according to width size.
- All gates come with free adjustable hinges and a free lockable latch fitting.
- All railings are supplied with adjustable side feet, which give 2.5cm adjustment.
- Wall Fixing Posts and Packer Posts can help solve the problem of a nonstandard opening. Please call our Technical Sales Team for advice.
- All gates and railings are supplied with a black primed finish as standard and should be treated with an exterior enamel paint, such as Hammercote, before exposing to the elements. Or we can supply them with a black painted finish.
- Many of our single gates are supplied with a universal latch so they can be hung left or right, some are right hanging only, as viewed from the roadside. Please ask before ordering.
- Weights shown in the price list are the approximate weight of the heaviest gate.
- All gates and railings are subject to a carriage charge, as stated in the price list.
- Gates should be checked immediately on receipt, to ensure that they are to your specification/satisfaction. Once checked, they should be treated before attaching any fittings or exposing to the elements.

# HOW TO ORDER

## Ready to order?

It would help us to give you a more efficient service if you could have the following details ready before you phone:

- Your required gate size for wooden gates, gap size for wrought iron style gates/railings.
- Do you need posts? If so, for wall-mounting or in-ground?
- For wooden gates, do you need any fixings/accessories?
- For drive or estate gates, do you require a lock; do you require automation?

## Order by phone 01543 462500

Pay by credit or debit card, 9am to 5:15pm Monday to Thursday, 9am to 4pm Friday. There is an answerphone service in operation at all other times.

Please note, calls may be monitored for training purposes.

Order online [www.cannockgates.co.uk](http://www.cannockgates.co.uk)

To contact us by email, please use the 'contact us' form on our website. We also have a live chat available in our working hours stated above. All orders will be confirmed in writing.

## Delivery

We are committed to delivering your goods as quickly as possible after receipt of your order – normally within 14 days, but please allow 28 days. Some items may arrive at different times due to despatch from separate depots. We will be happy to deliver your order directly to a friend or relative anywhere in the UK mainland. For bulk orders please ring for details of special carriage arrangements. Please note: If you are employing builders or fitters, please ensure you are in receipt of the goods before committing to an installation date. We cannot be held responsible for any consequential expenses if delivery is delayed. Please note: extra delivery charges may occur when delivering to outlying areas.

## Customer services

If you have any questions about your order either before or after delivery, please call Customer Services on 01543 462500.

Open 9am-5:15pm Monday to Thursday, 9am-4pm Friday.

If your enquiry is not urgent you could e-mail [sales@cannockgates.co.uk](mailto:sales@cannockgates.co.uk). Due to the volume of e-mails we receive please allow 3 working days for us to respond.

## Guarantee

In the unlikely event that you are not totally satisfied with any goods purchased from us, please inform us in writing (including fax or email) within 7 days, starting on the day after the goods are delivered to you, and once the goods have been returned to us, we will give you a replacement or refund. All products are guaranteed against faulty workmanship. If any item is found to be faulty, return it and we will be happy to correct the faulty part or send a replacement without charge. Upon receipt of goods, please follow carefully the instructions for assembly and advice on how to care for the product. Please bear in mind the following; a minor amount of natural movement is inherent in timber; rust is a natural effect on steel, which can be prevented by applying a good quality exterior metal paint. Our wrought iron style gates and railings carry a 10-year guarantee and our wooden gates a 5-year guarantee, when you follow the instructions given in our assembly and care leaflet provided with your gate/railing. Our guarantee covers the cost of replacing the defective product; it does not cover consequential expenses incurred as a result of replacing the product such as fitting and finishing costs. We will not accept responsibility for any damage caused by incorrect assembly of fittings, incorrect hanging or lack of treatment to gates. For wooden gates, we are unable to give any guarantee against shrinkage, warping or splitting which can be caused by natural reactions to variations in humidity and temperature. We will not reimburse the cost of repairs undertaken to gates without our prior consent, and such repairs would also invalidate your guarantee. Please note: because orders for non-standard gates are made to the customer's specification, we are unable to accept cancellation of orders and our 7-day money-back guarantee will not apply.

Your statutory rights remain unaffected.

## Returns

The goods must be returned to us untreated and unused and wherever possible in the original packaging, together with your receipt. We recommend that you retain all of the original packaging until you are sure that you intend to keep the goods. If the original packaging is not available you should use packaging that would provide similar protection, as returned items must be received 'as new' and in re-saleable condition. Carriage costs will be refunded only if the item is faulty or if it differs in any way from the advertised goods. Returned parcels remain the responsibility of the customer until safely received by us. The company does not pay return carriage unless an item is faulty or it differs in any way from the advertised goods. If you would like us to arrange collection of goods for return please contact Customer Services. Return carriage costs will be deducted from any refund due. We will not pay for the cost of failed collections. Please note we are unable to accept returns of gates if they have been treated by the customer or by us on behalf of the customer (not applicable to powder coated gates).
